CITY PERMIT HISTORY

- **No permits found at this address.** On a 70-year-old building, zero permits suggests major systems — plumbing, electrical, HVAC, and roofing — may be original or replaced without documentation. Budget aggressively for systems replacement.
- **Assume major systems are aging or original.** Cast iron drain lines, legacy electrical panels, aging HVAC, and unknown roofing vintage are common on pre-1990 stock. A thorough inspection is non-negotiable before committing to purchase.
- **Budget for capital expenditures.** Systems replacement and deferred maintenance on a 70-year-old building can run \$10K–\$20K/unit = \$360,000–\$720,000 total. Reflect this in your acquisition pricing.

Source: shovels. Absence of permits does not confirm no work was done — only that no permits were pulled, permits were pulled under different names/addresses, or permits were not found in our source data.

## DEAL CONTEXT & ANALYSIS

70-year-old, 36-unit multifamily. Broker represents: "Fully renovated in 2018." These claims require independent verification during due diligence. Zero permits on record for a 70-year-old building. Verify condition of all major systems during inspection and cross-reference against any broker capital improvement claims. County assessment (\$4,140,000) is 77% of ask, suggesting risk of future tax reassessment. A purchase at or near ask will likely trigger reassessment at the higher price at next cycle. Crime profile (grade D) positions this as a workforce / C-class housing play. Operators with experience in challenged submarkets may find value; institutional capital will largely pass. Area median HH income of \$88,464 vs. median gross rent of \$1,715/mo implies a rent-to-income ratio of ~23% for the median resident.

## KEY FLAGS & OBSERVATIONS

### SIGNIFICANT RISK — PROCEED WITH CAUTION

Multiple material risk factors identified. Do not move forward without resolving these issues through due diligence.

#### ! High Crime — Grade D

Crime grade D (43.15 per 1,000 residents); safer than only 18% of U.S. ZIP codes. Expect higher insurance premiums, lender scrutiny, and ongoing tenant quality challenges.

#### ! No Permit History on 70-Year-Old Building

Zero building permits on record suggests major systems (roof, HVAC, plumbing, electrical) may be original or replaced without documentation. Budget aggressively for systems replacement and do not rely on broker representations about capital improvements.

#### ~ Thin Coverage — DSCR Below 1.10x

Cash flow coverage is marginal at current rate scenarios. Any NOI shortfall from DealBrief estimates could push the deal into negative territory. Stress-test with actual operating statements.

#### ~ Reassessment Risk — Assessed at 77% of Ask

County appraised at \$4,140,000 vs. \$5,360,000 asking. A purchase at ask will likely trigger reassessment upward at next cycle, increasing annual taxes. Model the delta in your pro forma.

## RECOMMENDED NEXT STEPS

- **Request T-12 operating statement and current rent roll.** The broker's cap rate is an assertion, not a fact. Verify every line of income and expenses against trailing-12 month actuals and expected future scenarios before submitting an LOI.
- **Order a thorough property inspection.** On a 70-year-old building with no permit history, pay particular attention to: roof condition and remaining life, HVAC systems and ages, plumbing (including drain lines), electrical panels (load capacity and age), and foundation.
- **Speak with local portfolio lenders before making an offer.** The crime profile (D) may limit conventional financing options. Regional banks and credit unions familiar with the submarket are more likely to lend here than national platforms.
- **Confirm the utility structure.** Get actual utility bills for the trailing 12 months. Determine which utilities are landlord-paid vs. tenant-paid — this has a direct, significant impact on actual NOI vs. broker-stated NOI.
- **Verify occupancy, lease terms, and any concessions.** Confirm occupancy claim with a current rent roll and T12. Note lease expiration dates — a property with all leases expiring at closing carries significant rollover risk.
- **Model post-acquisition tax reassessment.** Current assessment is \$4,140,000. A purchase at \$5,360,000 will likely trigger reassessment upward at next cycle. Model the additional tax burden in your pro forma before submitting an LOI.
- **Get quotes from local insurance brokers.** Insurance estimates in this report are rule-of-thumb. Actual premiums depend on building age, condition, claims history, crime data, and flood zone. Get a real quote before LOI.
